- **Heating and cooling**
- **Appliances and electronics**
- **Lighting**
- **Water heating**

Whether you're a homeowner, renter, or business owner, you will find valuable tips in this book that will help you save money on your energy

costs.

Here is a sneak peek of some of the tips you will find in this book:

- **Heating and cooling:**
 - Insulate your home to prevent heat loss in the winter and heat gain in the summer.
 - Seal air leaks around windows and doors.
 - Use a programmable thermostat to automatically adjust the temperature in your home when you're away or sleeping.
 - Install energy-efficient windows and doors.
 - Consider installing a geothermal heat pump or solar panels to reduce your reliance on fossil fuels.
- **Appliances and electronics:**
 - Unplug appliances and electronics when you're not using them.
 - Use energy-efficient appliances and electronics.
 - Wash clothes in cold water and air-dry them instead of using the dryer.
 - Turn off the lights when you leave a room.
 - Use natural light as much as possible.
- **Lighting:**
 - Use energy-efficient light bulbs, such as LEDs and CFLs.
 - Install dimmer switches to control the amount of light you need.

- Use task lighting instead of general lighting.
- Open curtains and blinds during the day to let in natural light.
- Close curtains and blinds at night to keep heat in during the winter and out during the summer.
- **Water heating:**
 - Insulate your water heater.
 - Lower the temperature on your water heater to 120 degrees Fahrenheit.
 - Take shorter showers.
 - Install low-flow showerheads and faucets.
 - Fix any leaks in your plumbing.
