

# Donald Trump: The American Pericles

Donald Trump's presidency has been one of the most consequential in American history. His policies have had a profound impact on the country, and his actions have often been controversial. But what is the true legacy of Donald Trump? Is he a great leader like Pericles, or a dangerous demagogue who has damaged American democracy?

In his new book, *Donald Trump: The American Pericles*, historian John Smith argues that Trump is a complex and contradictory figure who defies easy categorization. Smith compares Trump to Pericles, the great Athenian statesman who led Athens to its Golden Age. Like Pericles, Trump is a charismatic leader with a gift for oratory. He is also a populist who has appealed to the common people. But unlike Pericles, Trump is a divisive figure who has alienated many Americans.

## The Rise of Trump

Trump was born in Queens, New York, in 1946. He is the son of a wealthy real estate developer. Trump attended Fordham University and the Wharton School of the University of Pennsylvania. After graduating from Wharton, Trump joined his father's real estate business. He eventually took over the business and expanded it into a global empire.

Trump first entered politics in 2015 when he announced his candidacy for president. He ran as a Republican and promised to "Make America Great Again." Trump's campaign was based on a populist message that appealed to working-class voters. He attacked illegal immigration, free trade, and the political establishment.

Trump's campaign was controversial from the start. He was accused of racism, sexism, and xenophobia. But he remained popular with his supporters, who saw him as a strong leader who was not afraid to speak his mind.

## **The Trump Presidency**

Trump was elected president in 2016. He defeated Hillary Clinton, the Democratic nominee, by a narrow margin. Trump's victory was a major upset, and it sent shockwaves through the American political establishment.

As president, Trump has pursued a number of policies that have been controversial. He has withdrawn the United States from the Paris Agreement on climate change, imposed tariffs on imports from China, and recognized Jerusalem as the capital of Israel. He has also appointed conservative judges to the Supreme Court.

Trump's presidency has been marked by chaos and division. He has been accused of obstructing justice, violating the emoluments clause of the Constitution, and colluding with Russia to interfere in the 2016 election. He has also been criticized for his handling of the COVID-19 pandemic.
