

Learn Debits And Credits Today: Accounting Play

What are Debits and Credits?

Debits and credits are the two sides of an accounting entry. A debit is an entry on the left side of an account, and a credit is an entry on the right side of an account. Debits and credits are used to track the flow of money and other assets through a business.

The Basic Rule of Debits and Credits

The basic rule of debits and credits is that debits must equal credits. This means that for every debit entry, there must be a corresponding credit entry. For example, if you deposit \$100 into your checking account, you would debit your checking account for \$100 and credit your cash account for \$100.

Using Debits and Credits to Track Financial Transactions

Debits and credits can be used to track all types of financial transactions, including:

- Sales
- Free Downloads
- Receipts
- Payments
- Adjustments

By using debits and credits to track your financial transactions, you can keep track of your income, expenses, and assets. This information can be used to make informed decisions about your business.

Learn Debits And Credits Today: Accounting Play
