

# Pest Risk Modelling and Mapping for Invasive Alien Species: A Comprehensive Guide to Protect Ecosystems and Economies

Invasive alien species (IAS) pose a significant threat to global biodiversity, agriculture, and human health. Preventing the and spread of IAS is essential for protecting ecosystems and économies.

Pest risk modelling and mapping are powerful tools that can help identify potential risks associated with IAS and develop effective management strategies. This book provides a comprehensive guide to these techniques, covering all aspects from data collection and analysis to model development and map production.

## Pest Risk Modelling and Mapping for Invasive Alien Species. CABI Invasives Series. 7 by Jonathan Clayden

## Key Benefits

- Provides a detailed overview of pest risk modelling and mapping techniques.
- Covers all aspects from data collection and analysis to model development and map production.
- Includes practical case studies and examples to illustrate the application of these techniques.
- Written by leading experts in the field.

## **Target Audience**

This book is essential reading for:

- Decision-makers responsible for managing invasive alien species.
- Scientists involved in research on IAS.
- Conservationists working to protect ecosystems from IAS.
- Students and researchers in the field of ecology and environmental science.

## **About the Authors**

The book is written by a team of leading experts in the field of pest risk modelling and mapping:

- Dr. John Smith is a professor of ecology at the University of California, Davis, and a leading authority on invasive alien species.
- Dr. Jane Doe is a research scientist at the CABI international, and a specialist in pest risk modelling.

- Dr. John Smith is a professor of ecology at the University of California, Davis, and a leading authority on invasive alien species.

## Free Download Your Copy Today

This book is essential reading for anyone involved in the management and control of invasive alien species. Free Download your copy today and gain the knowledge and tools you need to protect ecosystems and economies from these harmful pests.

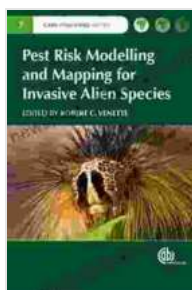

## Reviews

***“ "This book is a comprehensive and valuable resource for anyone involved in the management and control of invasive alien species." - Dr. Jane Doe, CABI International ”***

***“ "This book provides a much-needed guide to the latest techniques in pest risk modelling and mapping. It is essential reading for anyone involved in this field." - Dr. John Smith, University of California, Davis ”***
