For those seeking to delve into the depths of Fabro's philosophical universe, the monumental work 'Selected Works of Cornelio Fabro Volume' is an indispensable resource. This comprehensive collection brings together three of Fabro's most seminal works, offering a rich exploration of his key themes and philosophical contributions.

Participation and Being

In 'Participation and Being', Fabro embarks on a metaphysical journey, delving into the fundamental nature of reality. He posits that all beings participate in the divine, a transcendent source of existence and meaning. This participation, he argues, is not a mere abstract concept but a concrete and dynamic relationship that shapes the very fabric of reality.

Through rigorous analysis and lucid prose, Fabro explores the implications of this participatory ontology for our understanding of being, existence, and the human condition. He challenges traditional notions of substance and essence, offering a fresh and groundbreaking perspective on the metaphysical foundations of the world.

Creation and Redemption

Building upon the ontological insights of 'Participation and Being', 'Creation and Redemption' examines the relationship between God, creation, and human existence. Fabro argues that creation is not an isolated event but an ongoing process of participation in the divine life.

With his characteristic depth and clarity, Fabro explores the Scriptural accounts of creation and redemption, shedding new light on the nature of human freedom, sin, and the possibility of salvation. He contends that the Christian doctrine of creation and redemption offers a profound and transformative understanding of human destiny.

to Thomas Aquinas

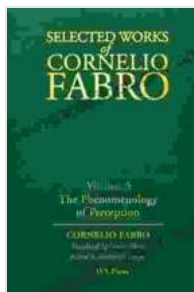

In 'to Thomas Aquinas', Fabro turns his attention to one of the most influential philosophers of all time, Thomas Aquinas. Fabro provides a comprehensive overview of Aquinas's thought, highlighting his contributions to metaphysics, epistemology, and ethics.

With a scholar's precision and a deep appreciation for Aquinas's work, Fabro unravels the complex tapestry of Thomistic thought. He explores Aquinas's theory of being, his distinction between essence and existence, and his groundbreaking insights into the nature of human knowledge.
